ABOUT

I m a Software Developer. I live in İstanbul. I can describe myself as a multi-hat developer especially focused on web and mobile-based technologies. I have worked as a Full Stack Developer in many projects professionally for about 8 years. I used Laravel, Angular in most of our projects. We have developed mobile applications with Ionic.

We are developing a field sales automation system in my company at the moment. We use Java on the backend and Angular on the frontend for this project. So I use Java for 2 years.

I worked as a manager for many projects and complete a lot of different project. Some projects are below
